

SWAT Input Files

Posted by Carlene - 2009/08/30 18:03

When I'm selecting the unweighted precipitation file during the SWAT Input File step I get the following message:

```
FormSWATWrite.GetDates()
```

Conversion from string "12/31/2001" to type "Date" is not valid.

Could someone help?

Thanks,
Carlene

I was looking at some other issues in the forum and I saw someone had the same problem and Shea gave the solution. I tried it and it worked! Sorry for putting up this post.

Shea

can you fix the link to the other post? i looked but didn't find the other post where the answer to this issue

was given.
